

# New!

## Presenting new Log Drawing and Reporting functionality from R-WEB

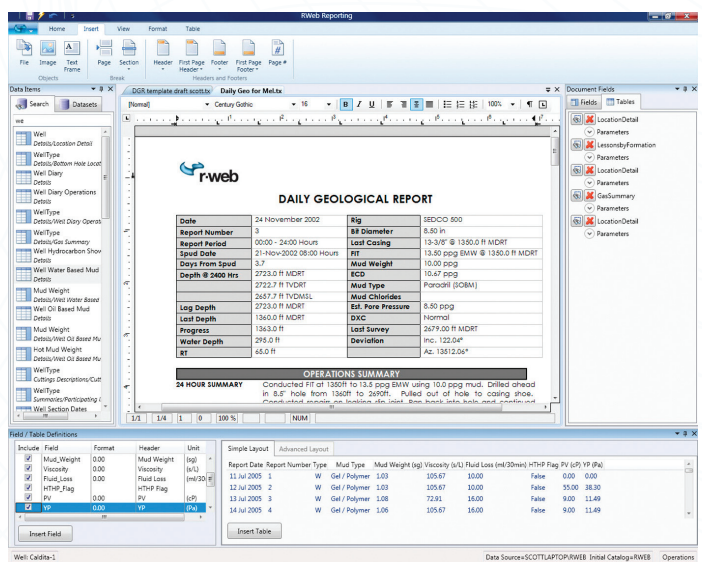

### Log Drawing

A new R-WEB/WellCAD link means you can generate a composite well log using R-WEB data in just a few steps

### New Reporting Module

Empower wellsite staff to create Well Completion Reports using our next generation reporting tool

### Generate reports and logs from a single QC database

- ✓ Simplify the compilation of lithology and composite well logs
- ✓ Empower your Wellsite Geologist to produce quality logs on a daily basis
- ✓ Reduce the burden of complicated log drawing processes

### Refreshingly simple report compilation

- ✓ A simple and intuitive tool that provides a significant reduction in report compilation time and expense
- ✓ The flexibility of Word in a structured database application
- ✓ Standardised, quality reports every time
- ✓ A quality controlled data capture tool
