

Powerful Functionality for a Range of Key Personnel

Wellsite Geologist's benefit through:

- Single location data entry for all critical wellsite information.
- Simplified and streamlined production and delivery of quality reports.
- Facilitation of consistent data capture.

Operations Geologist's benefit through:

- Delivery of standardised consistently high quality reports across all level of personnel competency.
- Streamlined production of consistently high final well reports.
- Establishment of templates derived standard report formats and quality.
- Operational reports including DGR's, cuttings, coring, formation evaluation, hydrocarbon shows and others.
- Reporting of service company performance evaluation.

Reservoir Engineer's benefit through:

- Efficient effective and comprehensive pressure analysis capability.
- Access to primary source of wellsite derived data.
- Comprehensive formation pressure analysis tools.

Wireline Witness

- Access to formation fluid sampling methodology.
- Central data capture facilitation of critical operational information.
- Single Location data entry for wireline information.

Petrophysists and Project Geologists

- Access to a control comprehension wellsite data hub
- On demand reporting in consistent format for critical operational data as required.
